Application/Control Number: 10/614,886

Art Unit: 3714

Applicant's arguments for withdrawal of the requirement for election of species are persuasive, and the election requirement has been withdrawn; claims 1-20 have been examined.

\* \* \* \* \* \*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2, 3, 8, 9, 19, & 20 are rejected under 35

U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is no disclosure of an opening means including a score line near one end of the housing, and a high viscosity plug near the other end of the housing; or a

10/614,886

Art Unit: 3714

first score line near one end of the housing and a second score line near the other end of the housing.

\* \* \* \* \* \*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-7, & 10-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Haber et al 5,490,736.

Haber shows a swab applicator including an elongated housing 42 (figure 9) which encloses liquid 52; an applicator tip 46, which may have dry compound 48 disposed within; and means 50 to release the liquid to the tip, to mix with the compound. A package 44 may seal the swab and dry compound therein.

\* \* \* \* \* \*

10/614,886

Art Unit: 3714

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
